

You've been assigned the Lock Challenge. Which lock will you pick?

I choose red

I choose purple

RED

You unfold the piece of paper that's attached to the lock and it has a bunch of 1s and 0s written on it.

The code says: 0100 1110 1010

Which combination do you try?

4-12-10 or 5-7-2

Your combination doesn't work...do you try to flip the piece of paper over or try again?

Neither combination worked...do you want to try again or give up?

PURPLE

You unfold the piece of paper that's attached to the lock and it says 02 20 02. Do you use this combination or a different one?

You entered the combination, pulled on the lock and it opened. Congratulations, you won!

Your combination doesn't work...Do you want to try again or use the code on the piece of paper?
